Projects on Python for Data Science

Project 1: Analyzing the Naming Pattern Using Python

Industry: General

Problem Statement: How to analyze the trends and the most popular baby names

Topics: In this Python project, I have worked with the United States Social Security Administration (SSA) which has made data on the frequency of baby names from 1880 to 2016 available. The project requires analyzing the data considering different methods. I have visualized the most frequent names, determine the naming trends and come up with the most popular names for a certain year.

Roles and Responsibilities :

Analyzing data using Pandas Library

Deploying Data Frame Manipulation

Bar and box plots with Matplotlib

Projects on Python for Data Science

Project 2: Covid 19 Using Python, choropleth

Industry: General

Problem Statement: How to analyze the trends and the most popular variants names

Topics: In this Python project, I have worked with the Covid19 data which has made data on the frequency of virus spread from March 2020 to 2021 available. The project requires analyzing the data considering different methods. I have visualized the most frequent names,

Roles and Responsibilities :

Analyzing data using Pandas Library

Deploying Data Frame Manipulation

PERSONAL INFORMATION

Date Of Birth : 06-01-1977

Sex : Male

Permanent Address: Sakri Gali, Allabuxpur, Gulzar Bag, Patna-800007(BIHAR)
